### OUR GOAL:

In 2008, Louisville adopted a complete streets ordinance. In 2016, Move Louisville embraced Complete Streets improvements to make Louisville's streets safer and easier to get around and Complete Streets became part of our city's vision for our future in Plan 2040. It's time we bring the current policy to meet national standards by including transparency, public input, and a focus on equity to ensure complete streets in every neighborhood.
